Vimal Vidyadharan

Enterprise AI & Digital Transformation Leader

Dubai, United Arab Emirates | vimzpy@gmail.com | linkedin.com/in/vimz | github.com/Lamiv | lamiv.github.io

PROFESSIONAL SUMMARY

Enterprise AI and digital transformation leader with more than 20 years in enterprise technology across global consultancies (IBM, Accenture, Wipro, Gavdi) and industry. Owns an enterprise AI roadmap and delivery portfolio, takes investment cases to a CEO-chaired AI Steering Committee, and has taken AI systems into production. Brings 10 enterprise SAP programmes across energy, brewing, consumer goods, utilities, industrial technology, shipping, retail and manufacturing, with hands-on AI architecture and engineering in Python and LangGraph.

CORE COMPETENCIES

AI strategy, roadmaps and use-case portfolio management | Business cases, ROI, NPV and IRR, investment recommendations | AI governance and responsible AI controls | Digital transformation and value realisation | Enterprise and solution architecture | SAP S/4HANA, SAP BTP, SAP SuccessFactors, SAP HCM, SAP Plant Maintenance | ERP implementation, global rollout and upgrade programmes | Enterprise integration: SAP Integration Suite, Event Mesh, OData, REST APIs, Microsoft Graph | Data and analytics: SAP BW, SAP Analytics Cloud, SAP Business Data Cloud, SQL, ETL/ELT | Agentic AI and multi-agent systems: Python, LangGraph, RAG, vector search, knowledge graphs | Technical pre-sales and solution design | Programme delivery, vendor and stakeholder management | Process improvement (Lean Six Sigma Green Belt)

PROFESSIONAL EXPERIENCE

Expert, AI & Digital Transformation

Manufacturing group (sugar refining), Dubai, United Arab Emirates | Dec 2015 – Present

Previously Expert, Business Excellence, and SAP Technical Architect with the same group.

- Own the enterprise AI roadmap and delivery portfolio, aligning use cases with business strategy, data readiness, resources and expected value.
- Build business cases with ROI, NPV and IRR, and take investment recommendations to a CEO-chaired AI Steering Committee with Legal, Risk & Assurance and Finance.
- Designed and built a production multi-agent customer-operations system in Python and LangGraph on local inference that classifies enquiries, complaints and release orders and routes them into SAP workflows through a least-privilege service user; monitored for usage, accuracy and incidents after go-live.
- Delivered pricing AI to production, supporting the commercial team's B2B pricing decisions.
- Modernised production accounting, replacing statistical yield estimates with automated, measurement-driven reporting across output, process losses and work-in-progress, bringing about USD 7M in annual product value into accurate production accounting.
- Transformed logistics through truck traffic management, scheduling and dispatch with real-time monitoring, improving truck turnaround by 24%; weighbridge automation integrated with SAP is in implementation.
- Redesigned procurement on SAP best practice and built negotiation analytics and dashboards; negotiating teams delivered about AED 2M in savings.
- Lead industrial vision AI for equipment monitoring, packaging operations and HSE reporting (validation and UAT), and SAP Business AI on SAP Business Data Cloud (development).
- Established responsible AI controls for privacy, cybersecurity, human oversight and performance, with status, risks and benefits reported to governance forums.
- As SAP Technical Architect, led architecture on an ongoing SAP programme including HR transformation and a Plant Maintenance implementation.

AI Strategic Advisor (pro bono)

Travanleo Info Solutions | 2020 – Present

Senior Manager; Manager, Customer Innovations; Manager, Gavdi Labs

Gavdi Group and Gavdi Labs (concurrent roles) | Oct 2014 – Dec 2015

- Led Managed Services, Centre of Excellence activities and project delivery for SAP HR and SAP SuccessFactors.

- Led technical pre-sales: customer demonstrations, requirements discussions, solution architecture and technical solutioning.
- Product owner for SAP-based HCM products at Gavdi Labs, covering product design and development, regional HR localisation, smart identity management, SuccessFactors integration, and SAP cloud and mobile solutions.
- Delivered global mobility and identity management projects for clients including ABB and Maersk, and UAE-localised payroll for Spinneys.

Project and Technical Lead

Wipro | Jan 2011 – Oct 2014

- Nike and Converse: SAP upgrade and rollout for about 5,000 users.
- DEWA Kawader: SAP HCM implementation; Kawader 2: e-Recruitment and Learning implementation.
- DEWA: SAP Plant Maintenance with work clearance management (PM-WCM) implementation.

SAP Technical Lead

Accenture | Dec 2009 – Dec 2010

- AB InBev global ERP (GERP) rollout to Canada (Labatt).

Systems Engineer

IBM | Sep 2005 – Dec 2009

- Shell GSAP (Downstream One) global SAP programme.

SELECTED AI PRODUCTS AND PROJECTS

- ESGAI (Ecodrisil): architected the AI layer of the ESG Xpress sustainability reporting platform, with plain-language queries over ESG data and reports aligned to GRI, ESRS, BRSR and VSME. In market.
- CareWiz AI: architected machine-learning scheduling for homecare agency management, matching available caregivers to staffing needs. In market.
- LEO: enterprise AI orchestration and memory architecture with an agent runtime, scoped memory and shared business capabilities. In progress.
- ZAKS Drive: open-source Go gateway implementing the SAP content-server protocol on Microsoft SharePoint; verified on SAP S/4HANA 2025 with SAP DMS. Pre-release.

EDUCATION

- Chief Data & AI Officer Programme, Indian School of Business, 2025
- MSc Artificial Intelligence (Distinction), Heriot-Watt University, 2021
- B.Tech Information Technology, Cochin University of Science and Technology, 2004

CERTIFICATIONS

Lean Six Sigma Green Belt | SAP Integration Suite | SAP BTP Extensions with SAP Cloud Application Programming Model (CAP) | SAP Analytics Cloud | SAP Activate Project Manager | SAP S/4HANA Asset Management
